Professional Summary

A highly driven Computer Engineering graduate (GPA: 3.55) bridging technical execution with strategic project management. Experienced in developing corporate web platforms (React.js/Tailwind) and deploying IoT solutions, backed by data and AI fluency from Bangkit Academy. Proven track record in cross-functional leadership and budget optimization. Eager to drive operational excellence and digital transformation in a Data & Technology Management Trainee capacity.

Education

Universitas Syiah Kuala

Banda Aceh, Indonesia

Bachelor of Engineering (S.T.) in Computer Engineering, GPA: 3.55/4.00

Aug 2022 – Aug 2026

- **Thesis:** Engineered a markerless Android Augmented Reality (AR) application using Unity 3D and Vuforia SDK for interactive computer hardware education, validated through System Usability Scale (SUS) and N-Gain cognitive evaluations.
- **Relevant Coursework:** Multimedia Technology, Front-End Development, Human-Computer Interaction (HCI), Signal Processing, Artificial Intelligence.
- **Honors & Awards:** National Finalist in the INFEST 9.0 UI/UX Design Competition; Awardee of the Top 180 National Funding for the Innovillage 2025 Social Project.

Experience

PT Permata Graha Nusantara (PGN Group)

Jakarta, Indonesia

IT Support & Web Developer Intern

Jan 2026 – Apr 2026

- Designed and developed 4 production-ready corporate web platforms (Fleedy, ArtBuild, FileExpert, and Spativm) using React.js and Tailwind CSS to visually showcase the company's 2025 operational scale and annual report data into a modern interface.
- Produced and configured static HTML5 code bundles from the React.js framework to ensure absolute compliance with internal corporate server deployment and security standards.
- Managed daily corporate IT infrastructure operations, including hardware/software troubleshooting and system license compliance audits across multiple internal departments.
- Moderated 2 official corporate knowledge-sharing webinars regarding Artificial Intelligence and Digital Cybersecurity, facilitating high-level discussions between academic professors and corporate executives.
- Executed new employee workstation configurations and managed corporate digital assets alongside shared file accessibility to streamline daily business support operations.

Stasiun Meteorologi Kelas I Sultan Iskandar Muda (BMKG)

Banda Aceh, Indonesia

AR & WebAR Developer Intern

Dec 2024 – Jan 2025

- Designed and developed an interactive Web-Based Augmented Reality (WebAR) educational application to visualize complex meteorological equipment (such as the Campbell Stokes recorder) into interactive 3D models.
- Reconstructed high-fidelity 3D assets from physical photos using the Meshroom photogrammetry engine and optimized topology and texturing in Blender for seamless mobile browser performance.
- Engineered spatial scenes and UI overlays in Unity and published the experience via Zapworks Studio, enabling instant QR code browser access without any application installation.
- Assisted the IT department with daily hardware maintenance, network stability operations, and technical sensor data processing.

Leadership & Activities

Computer Multi-Challenge Day (CMD) 2025

Banda Aceh, Indonesia

Organizing Chairman

Feb 2025 – Oct 2025

- Led and coordinated a multidisciplinary organizing committee of 7 divisions totaling 120 personnel to execute a national-level tech festival featuring a 24-hour Hackathon and UI/UX contests.
- Architected financial strategies and managed the overall event budget of IDR 21.04 Million with a balanced sheet and absolute transparency.
- Spearheaded the merchandising business unit end-to-end, generating IDR 9.74 Million in gross revenue to fund over 46% of the event's total operational budget.
- Exercised strategic financial management by restructuring the event prize pool to a sustainable sub-IDR 10 Million

allocation, ensuring operational feasibility amidst institutional funding constraints.

Pekan Bakti Mahasiswa Teknik (PBMT) XI & KKN Tematik USK

Aceh Besar, Indonesia

Vice Chairman

Jul 2024 – Oct 2024

- Coordinated a multi-disciplinary engineering student delegation for a 3-month intensive Thematic KKN and community empowerment program in Luthu Lamweu Village.
- Facilitated strategic collaboration between Engineering Faculty academics and the local government agency (DPMG Aceh Besar) in deploying village infrastructure innovations.
- Supervised the deployment of appropriate technology, notably an IoT-based Automatic Fertigation System (AFS) to automate agricultural irrigation for local farmers.
- Directed the technical rehabilitation of deep-bore wells to secure stable clean water distribution networks, aligning with the program's goal to elevate local living standards.

Himpunan Mahasiswa Teknik Komputer

Banda Aceh, Indonesia

Vice Head of Student Welfare (Kesma)

Jan 2024 – Dec 2024

- Managed academic advocacy and welfare aspirations for hundreds of Computer Engineering undergraduate students.
- Established regular mentoring and open consultation sessions to bridge student communication with department faculty.
- Proactively resolved student academic grievances regarding course scheduling and laboratory facilities.
- Strengthened student community engagement through structured welfare assistance programs.

Technical & UI/UX Projects

LifeGen - Mobile Health & Wellness UI/UX Platform | Figma, Maze

2023

- Architected a high-fidelity mobile health application prototype integrating automated calorie calculators and physical activity trackers.
- Validated user flows and interface touch-targets directly through comprehensive usability testing via the Maze platform.

LandConnect - Agricultural Connectivity Platform | Figma, User Research

2023

- Architected the system framework and UI/UX prototype for a digital agricultural land-leasing ecosystem, designing geospatial mapping and historical climate analytics functionalities.
- Conducted in-depth user research utilizing Value Proposition Canvas (VPC) to translate complex agricultural pain points into intuitive navigation structures.

Gula Cerdas - IoT Palm Sugar Standardization System | ESP32, Firebase, C++

2023

- Engineered an IoT system utilizing ESP32 microcontrollers, high-precision thermocouple sensors, and Firebase Cloud to automate boiling saturation and liquid viscosity monitoring for palm sugar SMEs.

Skills, Certifications & Trainings

Technical Skills: Python/TensorFlow, React.js, Tailwind CSS, HTML5/CSS3, Figma (UI/UX Prototyping & Wireframing), Usability Testing (Maze), Unity 3D, Vuforia SDK, Blender, ESP32, Arduino, Firebase, Git, Ms Excel, Ms Word.

Soft Skills: Leadership & Team Management, IT Project & Event Management, Executive Communication & Public Speaking, Stakeholder Management, Strategic Budgeting, Cross-Functional Coordination.

Trainings: Machine Learning Cohort Graduate (Bangkit Academy by Google/GoTo/Traveloka, 2024); Intensive UI/UX Design Bootcamp (Skill Academy, 2023).

Certifications: Certified Internet of Things (IoT) Engineer (BNSP, 2024); Certified Public Speaking & Special Event Specialist (Ministry of Manpower R.I. / BPVP, 2026).
